1MW solar power plant is not a small capacity system, so it is obvious that its generation capacity will be very high. But now the question comes that after all how much electricity can it actually generate. So let's see some calculations for it. Since a 1kW solar system generates = 4 units/day; Accordingly, 1MW will generate, 4 units x 1000kW = 4,000 units/day (1MW = 1000kW), & ...
