Battery Charging Cabinet Agent

What are battery charging cabinets?

Battery charging cabinets are a type of safety cabinet that's designed especially for lithium-ion batteries. Over the recent years, as the prevalence of lithium-ion batteries has grown in workplaces, battery cabinets have become more popular due to the many risk control measures that they provide.

What is a lithium-ion battery charging Safety Cabinet?

Justrite's Lithium-Ion battery Charging Safety Cabinet is engineered to charge and store lithium batteries safely. Made with a proprietary 9-layer ChargeGuard(TM) system that helps minimize potential losses from fire, smoke, and explosions caused by Lithium batteries. Shop Now

How does the batteryguard cabinet work?

The Batteryguard cabinet is also safe and easy to use for new personnel. It's simple: when you need to charge up your battery, you just open the cabinet and place the battery on the charger. Because the charger cables are fixed in the cabinet, you can be sure that you are always using an original charger for the battery.

How many batteries can a batteryguard cabinet hold?

Whether you have a great many batteries or just a few, large of small, the Batteryguard cabinet offers a solution for every situation. We offer compact models that charge 2 to 10 batteries and a spacious double-door safe where you can store up to 20 batteries.

Why do I need to close the cabinet doors if a battery catches fire?

Because the charger cables are fixed in the cabinet, you can be sure that you are always using an original charger for the battery. It is important that you always close the cabinet doors, because if a battery catches fire, that fire is kept inside.
