

Battery cabinet battery installation pictures and video

How do you reinstall a battery cabinet?

Reinstall the left side panel on the left-most battery cabinet after interconnection. Push the third battery cabinet into position, align with the seismic anchoring (if any), level the battery cabinet, and interconnect with the other battery cabinets as described in step 2, step 3, and step 5.

What is the purpose of a battery cabinet?

Battery cabinets are used primarily for aesthetic reasons to house batteries in an office environment. They are typically used with valve regulated lead acid (VRLA), semi-sealed batteries that form an integral part of the UPS. These cabinets are manufactured from mild steel and are then powder coated to a desired color.

How do you level a battery cabinet?

Remove the side panels that are adjacent to the other battery cabinets. Push the right-most battery cabinet into position. For seismic anchoring, ensure that the rear seismic bracket connects to the rear anchors. Lower the levelling feet until they connect with the floor - use a bubble-level to ensure that the cabinet is level.

Eaton's 93E External Battery Cabinet 30EBC and 60EBC Installation Manual. IMPORTANT SAFETY INSTRUCTIONS SAVE THESE INSTRUCTIONS This manual contains important instructions that should be followed during installation and maintenance of the UPS and batteries. Read all instructions before operating the equipment and save this manual for future ...
