Home Metallurgy, Mineral & Energy Steel & Products Steel Coil & Strip; Nickel Plated Steel for Battery Casing US\$2,390.00-3,234.00: 20 Tons (MOQ) Product Details. Standard: GB: Certification: ...

Steel-Shell Battery. The steel material for this battery is physically stable with its stress resistance higher than aluminum shell material. It is mostly used as the shell material of cylindrical lithium batteries. In order to prevent oxidation of the steel battery's positive electrode active material, manufacturers usually use nickel plating to protect the iron matrix of the steel ...

Battery steel shell roller plating drum price

Especially when in deep nickel electroplating for steel shells. When products with high quality requirements, then require more stable, reliable pre-treatment, to ensure high quality plating products.

In the production process of using battery shell steel, the typical defect is a sand eye defect. Reasons for the appearance of trachoma can be divided into steel surface defects, steel inclusions, user mold maintenance, and post-process nickel plating. Aluminium battery housing cases are better than steel cases for lithium-ion batteries. However, the price of aluminium ...
