

Change the hair clipper battery to a direct power supply

How to use the battery of a cordless hair clipper?

To use the battery of a cordless hair clipper effectively, avoid exposing it to extreme heat. Do not leave it charging all the time. Fully charge it for the first time. Prevent the battery from getting drained. As you may know, most of your devices with integrated batteries, including cordless hair clippers, use lithium-ion batteries.

How do I change the power of my hair clippers?

If you do find that you need to alter the power of your hair clippers, use a screwdriver or a thin coin to turn power screw in a clockwise direction until the arm strikes the coil, making a noise. Then, slowly turn power screw out (counter-clockwise), until noise stops. This is the maximum power setting.

How do I charge my Clipper?

Push the main body into the charging stand or appliance plug all the way. Charge within the recommended charging temperature of 10 °C to 35 °C. Clipper can be used for only about 10 minutes even after charging. Have the battery replaced by an authorized service center.

What if a hair clipper doesn't work?

If a hair clipper doesn't work at all, make sure power is on at the electrical receptacle, check the battery and recharge it if it is low or check the electrical cord. Unplug the unit, turn it over and manually move the blades. If necessary, test the motor and switches.

What is an electric hair clipper?

Commonly referred to as hair clippers or a hair trimmer, an electric hair clipper is a small motorized appliance that moves cutting blades across stationary blades to cut hair. An electric beard trimmer operates in the same way, except the motor and blades typically are smaller. An electric dog grooming clipper also operates similarly.

How do you use a qc5570 hair clipper?

Page 12 (see 'Using the swivel head '). 4 Press the on/off button to switch on the appliance. QC5570: Press the button briefly. QC5580: Press the button for 2 seconds. 5 Move the clipper through the hair slowly. English 6 Regularly remove cut hair from the comb attachment.

2 An appliance should never be left unattended when plugged into a power outlet, except when charging. 3 Make sure the power plug and cord do not get wet. 4 Do not plug or unplug the appliance with wet hands. 5 Do not use the product with a damaged cord.
