

FOB China prices for wafers have mostly fallen this week, mainly attributed to an oversupply scenario outweighing demand. Monocrystalline PERC G12 wafer prices decreased by 2.24% week-over-week to ...

In a new weekly update for pv magazine, OPIS, a Dow Jones company, provides a quick look at the main price trends in the global PV industry. FOB China prices for Mono PERC wafers remained stable this week, with Mono PERC M10 and G12 wafers priced at \$0.138/pv and \$0.196/pc, respectively.

3 ???&#0183; Wafer Prices In China: The Prices are surveyed by CNY term with Tax and then shown in USD term without 13% of VAT after April 1, 2019, 16% of VAT after May 1, 2018 and 17% of VAT before May 1, 2018. Solar PV Cell Weekly Spot Price

Wafer FOB China prices trended flat this week due to limited trading activity during the Lunar New Year holiday. Mono PERC M10 and G12 wafer prices remain steady at \$0.246 per piece (pc)...

Prices for China-made polysilicon chunks stayed at RMB 38-41/kg, averaging RMB 39.5/kg, with the low-price range reaching RMB 37/kg. Prices would hardly recover in the short term. For China-made granular polysilicon, prices were mostly sustained at RMB 36-37/kg, averaging RMB 36/kg.

FOB China prices for wafers have remained stable across the board this week. Mono PERC M10 and n-type M10 wafer prices held steady at \$0.145/pc and \$0.143/pc, respectively. Likewise, Mono PERC G12 ...

Price Trends: During the week, prices for 210mm N-type and 210R wafers declined further, while other specifications remained stable. As the industry approaches the Chinese New Year holiday season, with waning downstream demand, the rebound potential for 183X wafers appears limited.

FOB China prices for G12 wafers stayed relatively steady this week, with both Mono PERC G12 and N-type G12 wafer prices remaining flat at \$0.236/pc and \$0.238/pc, respectively. According to OPIS" market survey, the average transaction prices of Mono PERC M10 and N-type M10 wafers in the Chinese domestic market have descended to around ...

global solar production capacity, is expected to exacerbate the supply glut and drag prices across the solar supply chain down as more ...

TrendForce said in a new report that silicon material and wafer prices ...

Solar wafer prices this week held steady following four consecutive weeks of falling prices. FOB China prices of Mono PERC M10 wafers trended flat on-week at \$0.241 per piece (pc), while Mono PERC G12 wafer prices remained at \$0.356/pc. The primary cause of stable prices is a notable reduction in the availability of Mono PERC wafers, according ...

In the U.S, the trade representative announced this week that, effective Jan. 1, 2025, tariffs on imported Chinese solar wafers and polysilicon will rise from 25% to 50%. This decision is...

Similarly, FOB China prices for n-type M10 and G12 wafers showed no week-to-week changes, holding steady at \$0.132/pc and \$0.178/pc, respectively. M10 wafer production is reportedly conducted on a customized order basis without maintaining continuous inventory, ensuring relatively better profit margins compared to G12 wafers.

Each Tuesday you will receive an in-depth report with the week's polysilicon, wafer, cell and module price assessments, historical price data and expert insight to put it all in context. **REQUEST A FREE TRIAL** . OPIS Solar Weekly provides trusted price assessments and current market news on solar materials production in Asia, the EU and the US, from upstream ...
