Well, you could probably use a 1000W inverter with its 12V inputs clamped directly (safely!) to the car's starting battery while the engine is running and car parked. My 2019 CRV-EX, for example, I believe, has 100A or greater alternator capacity ($14V \times 100A = 1400W$), which charges the battery as well as provides electricity for spark plugs, lights, and ...
