

# Do battery stocks belong to new energy

Should you invest in battery stocks?

Investors have many ways to play the "green wave," or the pivot to a net-zero carbon world, but alongside EV stocks, hydrogen fuel cell stocks, solar stocks and other renewable energy plays, battery stocks are another strong choice. A big reason is that the pivot away from fossil fuels will not happen without advanced battery technology.

Should you buy EV/renewable stock in the battery space?

These types of stocks could make for a great way to gain broad exposure to this megatrend. Having said that, while the battery space offers broad EV/renewable exposure, don't assume buying any stock in this category is a worthwhile or potentially profitable move.

Should you buy battery stocks in 2024?

The International Energy Agency predicts a tenfold increase in battery demand for electric vehicles over the next decade. Battery stocks haven't fared well for much of 2024, but a big rally has put them back in the spotlight. The Global X Lithium & Battery Tech ETF (ticker: LIT) gained more than 20% in September.

Why is General Motors a play on battery stocks?

General Motors is a play on battery stocks for two reasons under its new long-term strategy: first, due to the utilization of renewable energy requiring energy storage systems, and second, as EVs require battery packs to run. This isn't your parents' GM stock.

Are battery Stock Exchange-Traded Funds a good investment?

Battery stock exchange-traded funds like BATT provide investors with exposure to leading U.S.-listed names in this space -- some of which will be discussed in further detail below. BATT also has holdings in foreign-based battery technology companies that are difficult for stateside investors to buy.

Should you buy battery stocks based on lithium-ion-based EV powerplants?

For the foreseeable future, battery stocks that are tied to lithium-ion-based EV powerplants are relatively insulated and making this space a no-brainer for investment. It's not about picking specific winners but the winning market, as battery technology will grow increasingly relevant.
