

# Ecuador Lead Acid Battery Collection Phone Number

Does ENVA recycle lead acid batteries?

As an end of life lead acid battery facility, Enva provide a complete battery recycling service for all types of lead acid batteries, using the latest technology to enable us to extract 99.5% of lead ready for re-use in the production of batteries and other lead-based products.

What are lead acid batteries?

Lead acid batteries are one of the earliest types of rechargeable batteries. Developed in the 1800s, they still have advantages over newer technologies being low cost, robust and reliable. Their wide-ranging applications benefit diverse environments;

Where are used batteries collected?

Two of the industry's most advanced and respected battery collection systems operate in Germany and the UK. Both are part of the Ecobat group and ensure the professional collection, transportation, and storage of used batteries, before forwarding the batteries for recycling at the Ecobat recycling plants.

Is ecobat battery a battery recycler?

Ecobat Battery is committed to its role as a battery recycler. As the world's largest producer and recycler of lead (1 million tonnes of secondary and lead production in EU, US and Southern Africa) Ecobat Battery is currently the only global company offering a closed recycling loop for lead-acid batteries.

How does ENVA dispose of used batteries?

Enva supply customers with approved containers for the safe storage of used batteries. Batteries are then transported in accordance with ADR regulations and waste management legislation to our licensed facilities for compliant disposal. For more information on battery collection and recycling services please Contact us.

What is ecobat battery?

As the world's largest producer and recycler of lead (1 million tonnes of secondary and lead production in EU, US and Southern Africa) Ecobat Battery is currently the only global company offering a closed recycling loop for lead-acid batteries. Ecobat employs more than 3,500 skilled employees worldwide.

FUNDAMETZ S.A. is the only ecuadorian company that has an Environmental Certificate that enables us to process and recover used lead-acid batteries. The Very illustrious Municipality of ...

process and recover used lead-acid batteries. The Very illustrious Municipality of Guayaquil performs periodic environmental audits monitoring the air, the soil and the water to guarantee that pollution does not take place in our processes of ...

The ECOSTEPS program provides an environmentally and occupationally responsible service of collection, transport, storage and use of used lead acid batteries. We collect and carry out a sustainable management of lead-acid batteries where the adequate disposal of ...

First, properly sort your old batteries by type - such as lead acid, zinc-based (alkaline batteries), nickel metal hydride and lithium-ion batteries. This is essential as it helps ensure the recycling plant can recover more of the original material to use in new products. Then arrange battery collection as frequently as you require, and we'll do everything in our power to dispose of them ...

Phone: Emergency tel. no. +1 703 527 3887 2. Composition and Information on the Main Ingredients ... Spent lead-acid batteries (EWC 16 06 01) are subject to regulation of the EU Battery Directive (2006/66/EC) and its adoption into national legislation on the composition and end-of-life management of batteries. Spent lead-acid batteries are recycled in lead refineries (secondary ...

Lead-acid batteries are widely used in various industries due to their versatility and reliability. In this section, I will discuss some of the most common applications of lead-acid batteries. Automotive Industry. Lead-acid batteries are commonly used in the automotive industry to power vehicles. These batteries provide the necessary electrical ...

Product types: uninterruptible power supplies UPS, sealed lead acid batteries, computer and electronic components, telecommunications power systems. Address: Gregorio Munga N39 ...

Lead-acid batteries, enduring power sources, consist of lead plates in sulfuric acid. Flooded and sealed types serve diverse applications like automotive. Home; Products . Lithium Golf Cart Battery. 36V 36V 50Ah 36V 80Ah 36V 100Ah 48V 48V 50Ah 48V 100Ah (BMS 200A) 48V 100Ah (BMS 250A) 48V 100Ah (BMS 315A) 48V 120Ah 48V 150Ah 48V 160Ah ...

Do you have questions or comments about our recycling services? Connect with one of our representatives. We collect your old batteries and put them through our recycling scheme. ...
