

# Expired battery replacement price

How much does a car battery replacement cost?

In addition, if you have a mechanic install the battery for you instead of doing the work yourself, you'll pay around \$30 in labor. The table below shows a quick price comparison of car battery replacement cost estimates from reputable suppliers:

How much does a EV battery replacement cost?

According to a study published by Recurrent in 2023, EV battery replacements range between roughly \$5,000 and \$20,000 for all brands. Fortunately, the same report indicated that of around 15,000 EV drivers, the battery failure rate is just 1.5%. Still, that slight chance of a battery replacement out of warranty can be a serious financial setback.

How much does it cost to replace a Tesla battery?

Tesla revealed that the price was \$15,000, and that the battery used as the replacement was not a new battery, but rather a refurbished battery installed by Tesla's service center. In this case, the cost to replace the battery with a used one was roughly equal to the residual value of the used Tesla.

How much does a used battery cost?

I can send you screenshots if you want. You can get a used battery for \$5k but they weigh 1000lbs so installing it would be tough. The battery comes in one piece with the BMS, PCS, and charger to make factory assembly easier but also means you're buying everything when one of those goes bad.

How much does it cost to replace a BEV battery?

The prices ended up being about \$60,000 Canadian, roughly equal to the price of the vehicle when new. So, from this pair of examples, we know that BEV batteries are extremely expensive to pay out of warranty to replace. Another example was a Tesla owner who has had multiple batteries in his vehicle replaced.

How much does a lithium ion battery cost?

This is significantly higher than the \$139/kWh average quoted by Bloomberg in November 2023, following a period of lithium-ion battery price drops. Newer lithium iron phosphate (LFP) battery packs have a global weighted average of \$130/kWh and are seen as crucial to lowering battery costs in the near future.
