

How to choose a battery pack in Equatorial Guinea

Do you need an external battery pack?

Modern gadgets are power hungry. If you want to make it through a long commute or a cross-country flight without having to plug your tablet or gaming device in, you're going to need an external battery pack to keep the electrons flowing. Read on as we show you how to shop for a pack that will meet your needs and keep your screens glowing.

How do I choose a battery pack?

Use the following checklist to ensure you end up with a battery pack that meets your needs. 1. Write down your total mAh needs and multiply that value by the percentage you want to extend your battery life (0.5 for 50%, 1.0 for 100%, 1.5 for 150% and so on).

How do you charge a battery pack?

Instead of plugging your charging cable into the wall, you instead plug the charging cable into the battery pack and fill up the device's batteries that way. Not all battery packs are created equal, however, and even if the build quality is good, you can easily end up with an external battery pack that doesn't fit your application and power needs.

What are the different types of battery packs?

There are two basic types of battery packs: primary and secondary or rechargeable. Primary batteries are disposable, non-rechargeable devices. They must be replaced once their energy supply is depleted. Secondary or rechargeable batteries contain active materials that can be regenerated.
