

How to install the battery panel in the tool box

How do you install a new battery?

Place the new battery in the panel in the same spot where the old battery was installed. Firmly push the RED wire connector onto the battery's red terminal, and then do the same with the BLACK wire connector to the black terminal. Plug the transformer back into the outlet and if necessary, screw it back into the wall outlet.

How do you remove a battery from a control panel?

Unplug the control panel's transformer from the outlet. You may need the screwdriver to remove the screw that secures the transformer to the outlet. Open the control panel cover either by removing the two screws on the side of the front control panel cover or with the control panel key. Quickly inspect the old battery.

How do you connect a battery to a wall outlet?

Firmly push the RED wire connector onto the battery's red terminal, and then do the same with the BLACK wire connector to the black terminal. Plug the transformer back into the outlet and if necessary, screw it back into the wall outlet. Close and secure the control panel cover.

How do I replace a battery?

CAUTION: You should apply a piece of electrical tape over each battery terminal to prevent any metal from touching the terminals. Take the new battery out of its packaging. If necessary, remove the plastic terminal protectors if the battery has them. Place the new battery in the panel in the same spot where the old battery was installed.

How do you level a battery cabinet?

Remove the side panels that are adjacent to the other battery cabinets. Push the right-most battery cabinet into position. For seismic anchoring, ensure that the rear seismic bracket connects to the rear anchors. Lower the levelling feet until they connect with the floor - use a bubble-level to ensure that the cabinet is level.

How do you reinstall a battery cabinet?

Reinstall the left side panel on the left-most battery cabinet after interconnection. Push the third battery cabinet into position, align with the seismic anchoring (if any), level the battery cabinet, and interconnect with the other battery cabinets as described in step 2, step 3, and step 5.
