

Lithium battery tax number

Does GST apply to lithium ion batteries?

At present, GST applies to most types of batteries, like lead-acid batteries, lithium-ion batteries, etc. The rate of GST depends on the use of the battery and the type of battery. To keep a check on tax evasion, the government has also made it compulsory to present e-way bills for the movement of goods within the country.

Can I import a lithium-ion battery?

However, there may be additional import tax and minimum threshold rules for this item. Please use our Landed Cost Calculator to get a full breakdown of the import duty, sales tax and any additional import charges payable on your import. You can also use our HS Lookup tool to get the full length HS code for your lithium-ion battery.

What is the GST rate for batteries in India?

GST is the Goods and Services Tax, which is a value-added tax that is applied to most goods and services in India. The GST rate for batteries depends on the type of battery. Lithium-ion batteries are taxed at 18%, while other secondary batteries and electric accumulators are taxed at 28%. What is the HSN code of battery and GST rate?

What is the tax rate for a 8506 battery?

The tax rate for 8506 depends on the type of battery. Lithium-ion batteries are taxed at 18%, while other secondary batteries and electric accumulators are taxed at 28%. What is the HSN code 85061000?

What is the GST rate on bike Batteries & car batteries?

Answer: The GST rate on bike batteries and car batteries depends on the type of battery used. The GST rate on lithium-ion batteries is 18%, while other secondary batteries and electric accumulators attract a GST rate of 28%. 4.

What is input tax credit (ITC) on batteries in India?

Input Tax Credit (ITC) is available on batteries in India, subject to certain conditions. Businesses can claim ITC on the GST paid on batteries purchased for use in their business operations. ITC cannot be claimed on batteries used for the manufacture of exempt goods or goods used for personal consumption.

Please use our Landed Cost Calculator to get a full breakdown of the import duty, sales tax and any additional import charges payable on your import. You can also use our HS Lookup tool to get the full length HS code for your lithium-ion battery .

The cylindrical lithium-ion battery model name is composed of three letters and five digits. IEC61960 stipulates the rules for cylindrical batteries as follows: Cylindrical lithium-ion battery with 3 letters followed by 5 numbers. ...

Lithium battery tax number

BIS has enacted these standards to ensure that all safety requirements are met, thereby minimizing potential risks associated with lithium-ion batteries. Each primary or secondary battery/cell covered under the CRS scheme, including lithium-ion batteries, must be BIS registered and bear the standard mark with a unique registration number. BIS ...

Specifically, lithium-ion batteries, commonly used in some vehicles, are taxed at 18%. On the other hand, other secondary batteries and electric accumulators attract a higher GST rate of 28%. Do I need to generate ...

The Battery Directive covers portables batteries, industrial and automobile batteries, and accumulators. Below we provide some examples of batteries that are under the scope of the Battery Directive: Lithium-ion batteries; Lithium metal battery; Alkaline battery; Nickel cadmium batteries; Nickel metal hydride batteries; Button-cell batteries

Lithium-ion batteries are taxed at 18%, while other secondary batteries and electric accumulators are taxed at 28%. What is the HSN code of battery and GST rate? The HSN code for battery is 8506 .

Please use our Landed Cost Calculator to get a full breakdown of the import duty, sales tax and any additional import charges payable on your import. You can also use our HS Lookup tool to ...

Learn to read lithium battery labels. Understand key details like voltage, capacity, and safety warnings for safe and efficient battery use.
