

Mauritius complains about new energy battery companies

Under the 2022-2023 national budget, the government committed to initiatives including setting up 140MW of hybrid renewables-plus-storage facilities with private entities, ...

Addressing the challenges posed by renewable energy waste, the Mauritius Renewable Energy Agency (MARENA) has partnered with the United Nations Development Programme (UNDP) to commission consulting firm Strategos Ltd to conduct a study.

When should you file a complaint about your energy company? If you're having an issue with your energy company, your first step should probably be to contact that company itself.

Critics are questioning the timing of this appointment as Mauritius grapples with a decline in renewable energy usage, dropping from 21.5% in 2021 to 19.2%. The ...

French renewable energy producer, Qair, has signed four PPAs with the Central Electricity Board (CEB) of Mauritius for the development of solar PV energy facilities and ...

In his address, Minister Lesjongard underlined that the 20 MW BESS is in line with Government's policy to encourage the use of Renewable Energy and clean energy in view to reduce the country's dependence on fossil fuels and ...

Solar power was the second largest source of renewable energy, accounting for 5.1%. Numerous projects have been announced to boost those figures, and as encouraging as they sound, we've found major problems in the government's plans to ...

Thanks to its knowledge in batteries spanning back more than 100 years, its experience in consumer batteries and portable power solutions has positioned it as one of the leading companies in energy storage solutions, albeit on a more micro, everyday scale. When it comes to solar storage, its battery systems offer flexible storage options to support the ...

NextSource Materials Inc. (NSM), a battery materials development company based in Toronto, Canada, is eyeing a move to Mer-Rouge with ambitious plans to become a global supplier of batteries and technological materials for a sustainable energy revolution. In a strategic move, the company has chosen Molo Graphite Mining, a mining firm based in ...

Under the 2022-2023 national budget, the government committed to initiatives including setting up 140MW of hybrid renewables-plus-storage facilities with private entities, investment in about 30MW of ground-mount

Mauritius complains about new energy battery companies

and commercial solar PV, and the new 20MW battery storage system.

French renewable energy producer, Qair, has signed four PPAs with the Central Electricity Board (CEB) of Mauritius for the development of solar PV energy facilities and battery storage systems with a total capacity of up to 60 MWac, contributing to the country's decarbonization goals.

Critics are questioning the timing of this appointment as Mauritius grapples with a decline in renewable energy usage, dropping from 21.5% in 2021 to 19.2%. The government's ambitious renewable energy targets of 35% by 2025 and 60% by 2030 add to concerns.

It brings the total BESS capacity operated by the government-owned Central Electricity Board (CEB) to 38MW. That includes two 2MW systems built first in 2018, followed by 14MW of batteries split across four sites at substations, three of 4MW and another 2MW connected to the grid. The BESS resources are aimed at enabling Mauritius to reach its ...

Mauritius and a renewable energy producer have entered into a \$163 million power purchase agreement which will see four solar PV and battery storage hybrid facilities built in the Indian Ocean country. Qair, an independent renewable energy producer, signed the deal with the Mauritius Central Electricity Board last month in what the company described as "the ...

Be Energy Mauritius: sustainable solutions to the waste issue in Mauritius. In October 2023, Be Energy Mauritius joined the Be Energy network and benefited from on-site training, designed to make technicians and sales staff operational in new, high-impact jobs involving battery regeneration.

A new EU regulation [1] which concerns batteries and waste batteries (the "Sustainable Batteries Regulation") came into force on 17 August 2023 and will be applicable from 18 February 2024. By repealing the Batteries Directive [2] and reforming the current legislative framework governing the manufacturing and supply of batteries, the aim is ...
