

A significant \$138.5 million investment package to improve Namibia's electrical infrastructure has been certified by the World Bank. The package places special emphasis on the integration of renewable energy through reinforced transmission lines and the installation of a second utility-scale battery storage facility. Under the leadership of ...

Namibia's planned new battery storage system brings it closer to reaching its green-energy goal. Its Renewable Energy Policy aims to modernise the energy sector, make it more self-reliant and turn it into a net exporter of power.

A joint venture (JV) between the two Chinese companies will deliver the 54MW/54MWh Ombuu battery energy storage system (BESS) project in Namibia's Erongo Region, at the existing Omburu Substation. Construction ...

Key contracts have been signed for the first-ever grid-scale battery storage project in Namibia, signifying the African country's dedication to modernising its energy infrastructure, according to a top local official.

According to foreign media reports on the 20th, the U.S. Congress has passed new regulations prohibiting the Department of Defense from purchasing batteries produced by six Chinese companies. These companies include Contemporary Amperex Technology Co., Limited (CATL), BYD, Envision Energy, EVE Energy, Guoxuan High-Tech, and Sunwoda Energy ...

Namibia is set to expand its power storage capacity in the energy sector with the introduction of the first-ever Omburu battery energy storage system (BESS). "The BESS project will help government accomplish ...

WINDHOEK, Dec. 13 (Xinhua) -- Namibia's power utility, NamPower, on Wednesday signed an agreement with two Chinese companies for the development of the country's first ...

Agence Française de Développement (AFD) Group of France is investigating the possibility of funding renewable energy battery storage projects in Namibia, Head of State ...

Namibia is set to expand its power storage capacity in the energy sector with the introduction of the first-ever Omburu battery energy storage system (BESS). "The BESS project will help government accomplish its goals by ensuring electricity supply security, cost efficiency and self-sufficiency," said NamPower managing director Kahenge ...

Namibia Congress New Energy Batteries

by ensuring electricity supply security, cost efficiency and self-sufficiency," said NamPower managing director Kahenge Haulofu yesterday.

Agence Fran#231;aise de D#233;veloppement (AFD) Group of France is investigating the possibility of funding renewable energy battery storage projects in Namibia, Head of State Owned Enterprises, Ntumba Katabua disclosed in an interview.

A significant \$138.5 million investment package to improve Namibia's electrical infrastructure has been certified by the World Bank. The package places special emphasis on the integration of renewable energy through reinforced ...

The collaborative effort is aimed at spearheading the development of the country's inaugural 54 MW/54 MWh utility-scale Battery Energy Storage System (BESS). The BESS represents a monumental advancement enabling the storage and timely distribution of electricity as per demand, an essential innovation in the country's energy infrastructure.

Namibia's planned new battery storage system brings it closer to reaching its green-energy goal. Its Renewable Energy Policy aims to modernise the energy sector, make it more self-reliant and turn it into a net ...

Namibia is set to expand its power storage capacity in the energy sector with the introduction of the first-ever Omburu battery energy storage system (BESS). "The BESS project will help government accomplish its goals by ensuring electricity supply security, cost efficiency and self-sufficiency," said NamPower managing director Kahenge Haulofu yesterday.

The Omburu energy storage project is the first independent large-scale grid-side battery energy storage project in Namibia, funded by utility and government grants. The 58MW/75MWh lithium-ion battery project, which will be commissioned in the third quarter of 2023, will release stored photovoltaic power when needed. Given Namibia's vertically integrated ...
