What is battery pack price?

IEA analysis based on data from Bloomberg and Bloomberg New Energy Finance Lithium-Ion Price Survey (2023). "Battery pack price" refers to the volume-weighted average pack price of lithium-ion batteries over all sectors. Price of selected battery materials and lithium-ion batteries, 2015-2024 - Chart and data by the International Energy Agency.

What is the difference between lithium ion battery prices and nickel prices?

Data until March 2023. Lithium-ion battery prices (including the pack and cell) represent the global volume-weighted average across all sectors. Nickel prices are based on the London Metal Exchange, used here as a proxy for global pricing, although most nickel trade takes place through direct contracts between producers and consumers.

How much does a battery cost in China?

On a regional basis, average battery pack prices were lowest in China, at \$94/kWh. Packs in the US and Europe were 31% and 48% higher, reflecting the relative immaturity of these markets, as well as higher production costs and lower volumes.

What is the KYOS battery index?

The KYOS Battery Index reports cashflows in a specific past month for the defined battery and market. The index is a single value per market and expressed in EUR/MW/day. The data sources are: EPEX (ID1) for NL, BE, DE, GB. TenneT, Elia and Elexon for Imbalance in NL, BE and GB. OMIE for ES.

Will local battery manufacturing drive up prices?

BNEF said that local battery manufacturing in regions such as the United States and Europe can drive up prices in the short term due to the price of energy, equipment, land and labor in these regions compared to Asia. "However, as the industry matures, these costs could end up falling," it said.

What happened to battery prices in 2024?

New York, December 10, 2024 - Battery prices saw their biggest annual drop since 2017. Lithium-ion battery pack prices dropped 20% from 2023 to a record low of \$115 per kilowatt-hour, according to analysis by research provider BloombergNEF (BNEF).
