

New Energy Storage Technology in Manila

The Philippines Department of Energy (DOE) has outlined new draft market rules and policies for energy storage, a month after the country allowed 100% foreign ownership of renewable energy assets.

The main focus of energy storage research is to develop new technologies that may fundamentally alter how we store and consume energy while also enhancing the performance, security, and endurance of current energy storage technologies. For this reason, energy density has recently received a lot of attention in battery research. Higher energy density batteries can ...

Ingrid Power Holdings Inc. plans to put up a 150-megawatt battery energy storage system in Barangay Malaya, Pililla, Rizal with estimated construction cost of P6.875 billion. Ingrid is the special purpose vehicle of AC Energy Inc. and Axia Power Holdings Philippines Corp., a subsidiary of Marubeni Corp. of Japan.
