

New battery pack specifications and prices

The price of lithium-ion battery packs has dropped 14% to a record low of \$139/kWh, according to analysis by research provider BloombergNEF (BNEF). This was driven by raw material and component prices falling as production capacity increased across all parts of the battery value chain, while demand growth fell short of some industry expectations.

Estimates place lithium-ion battery pack costs to less than US \$100/kWh in 2026, as lithium extraction and refining capacities continue to increase. The cost of batteries is a significant factor in EV manufacturing expenses and it experienced a substantial drop from \$732/kWh in 2013 to \$141/kWh in 2021, with a slight increase in 2022.
