

# New energy precision battery structural parts pictures

On August 16, SZKL Precision Technology Group issued an announcement saying that with the rapid development of new energy vehicle markets at home and abroad, the company now plans to use its own funds of 250 million yuan to implement Fujian power lithium batteries through its wholly-owned subsidiary FJKL Precision Industry Co., Ltd. Phase I project ...

New energy vehicle Lingyi iTECH has currently laid out a range of products for power battery cells, including aluminum casings, cover plates, and busbars, as well as other automotive-related precision structural parts such as flexible soft connections and injection parts.

Zhenyu raked in earnings of CNY3.2 billion (USD450 million) from the sale of precision structural parts of batteries last year, accounting for 56.6 percent of its total revenue, according to the firm's 2022 financial report. Zhenyu's share price [SHE:300953] was trading up 1.1 percent at CNY73.14 (USD10.20) as of 12.30 p.m. China time today.

Workers are producing precision structural parts for new energy batteries at a workshop in Ningde City, Fujian Province, China, on July 20, 2023. Get premium, high resolution news photos at Getty Images

In the field of the production of new energy power battery structural parts, we have made significant technological innovation breakthroughs. Through in-depth research and ...

Its core precision parts include batteries, battery management systems (BMS) and battery pack structural parts. As a unit for storing electrical energy, the performance of the battery cell ...

After more than 20 years of development, Kedali has embraced outstanding R& D technical strength in the field of precision structural parts for power lithium batteries applied in new energy vehicles and has formed a large scale of production and sales, occupying a leading market position. Since new energy vehicles are currently in the rising ...

# New energy precision battery structural parts pictures

As an important equipment in the field of battery manufacturing, automation equipment for new energy power battery structure has the characteristics of high efficiency, ...

China's thin-walled precision high-frequency welded tube industry Focus on the research, development, production and sales of automobile heat exchange system, power battery structural parts of new energy vehicles and other parts

Its core precision parts include batteries, battery management systems (BMS) and battery pack structural parts. As a unit for storing electrical energy, the performance of the battery cell directly determines the cruising range and safety of electric vehicles. At present, lithium-ion batteries have become the mainstream choice because of their ...

As an important equipment in the field of battery manufacturing, automation equipment for new energy power battery structure has the characteristics of high efficiency, precision, flexibility, stability, energy saving and environmental protection ...

New energy power battery structural parts, as the cornerstone of the power battery system, carry vital functions and roles.

Its basic components include: module control (commonly known as BMS slave board), battery cells, conductive connectors, plastic frames, cold plates, cooling pipes, pressure plates at both ends, and a set of fasteners that combine these components together.
