

Last week the latest report on the Nordic battery value chain was published. The report discusses the status of the Nordic battery value chain at the end of 2022, the drivers in the market, as well as what is needed to ...

Aluminium Bar Price in Norway (CIF) - 2023. In August 2023, the average aluminium bar import price amounted to \$6,237 per ton, declining by -21.2% against the previous month. In general, the import price saw a slight decrease. The pace of growth appeared the most rapid in July 2023 when the average import price increased by 33% month-to-month. As a ...

Norway has been processing raw materials for over 100 years. Today the processing industry has a minimal carbon footprint, providing clean, high-quality materials that are vital components in modern-day battery technology, such as aluminium, silicon, nickel, cobalt, graphite and copper.

Norway's maturing battery industry embraces green energy storage. An innovative example of circularity is Hydrovolt, an EV battery recycling joint venture between Hydro, a Norwegian ...

Norwegian authorities have to a lesser extent taken direct steps to enable Norwegian business and industry to share in the global business opportunities that arise from the market development, despite the fact that Norway produces many of the materials currently used in batteries (e.g. aluminium, nickel, copper, graphite and silicon).

Last week the latest report on the Nordic battery value chain was published. The report discusses the status of the Nordic battery value chain at the end of 2022, the drivers in the market, as well as what is needed to build the industry further.
