

# Remote battery location

Where are remote battery terminals located?

Typically, remote battery terminals are deliberately placed away from the battery. If your vehicle comes with negative (-) and positive (+) remote terminals, they're generally close to each other, in these locations: In the trunk or frunk, usually behind plastic trim panels. Behind a removable bumper plug.

Where should a remote charging terminal be mounted?

Mounting remote charging terminals in a discreet location allows you to charge or jump your hidden battery without direct access to it. Remember that when considering mounting a battery under a pickup bed or down on the frame where it requires under car access.

How does a remote battery terminal work?

This remote battery terminal features a safety tab between the terminals to keep cable clamps from coming into contact. Mount anywhere and any position to charge or jump-start your equipment when needed without diving headfirst into your engine bay. Made with a copper core bushing and a large brass nut to transfer maximum power.

Do I need a remote battery terminal?

And if you do mount your battery in a hard to access location, we highly recommend remote battery terminals be installed to allow maintenance charging, the ability to connect jumper cables, or a lithium jumper pack if you find yourself with a dead battery. [What Do I Need for Battery Relocation?](#)

Where should a car battery be installed?

Installing your battery in the trunk area is the most common spot for several reasons. Primarily is the ability to move weight (often 30 or more pounds) from in front of the front axle line to over or just behind the rear axle line. This is a tremendous help in weight transfer in many racing applications.

Do remote battery terminals have a cover?

They also may have a cover. The positive (+) remote battery terminals will have a red plastic cover, with a large embossed (+) symbol. Never connect jumper cables to any other connectors. Remote battery terminals require minimal maintenance, but you should check them as part of your annual maintenance service.
