

Replace the control cabinet battery

Why do I need to replace the battery in my control cabinet?

In addition, timely replacement of batteries can ensure reliable power supply to the control cabinet to avoid data loss or system failure. Please note that before performing any repair and replacement operations, you should consult Yaskawa Robotics' technical support team to ensure the correctness and safety of the operations.

How do I replace a battery?

Position a small flat screw driver underneath the battery on the side of the spring retainer and carefully pry underneath the battery to remove the battery. Remove the protective film from the new battery. Install the new battery, make sure the "plus" symbol faces up.

How do you replace a battery on a CNC machine?

Turn on machine (CNC) power. Replace the battery under the emergency stop state for safety, to escape the machine from moving during the replacement work. If the battery is replaced while the power is off, the memorized absolute position data will be lost, thus necessitating a reference position return operation.

How do I replace a battery on my HP laptop?

Remove the connector (CP8) on the main board towards you. Connect the connector of new battery to main board. Mount a battery and put the battery cover back on. Close the cabinet. Turn on the power to the machine (CNC) to check that no alarm appears on the screen of display unit. Turn off the power to the entire machine before opening the cabinet.

How do I replace a battery on a Lenovo laptop?

The battery used for memory back up is located on the front of the main board. Remove the battery cover on the main board by holding the upper and lower part of the battery cover and pulling it towards you. Then take off the battery. Remove the connector (CP8) on the main board towards you. Connect the connector of new battery to main board.

How long does it take to replace a battery on a CNC machine?

Never replace the battery with other than the specified type (A02B-0177-K106). Turn off the power to the machine before replacing the battery. Complete the replacement work within 30 minutes. The contents of CNC memory may be lost if the power is turned off, and the battery is removed for 10 minutes or more.
