

# Solar cell watch battery can be replaced

Can you replace a solar watch battery?

You can replace a solar watch battery, but chances are you will not need to for years and years. Regular maintenance, such as cleaning the dirt and sweat off the watch's body, will help prolong the battery's span. Solar watches use sunlight to generate the electrical energy needed by the watch to keep ticking.

Do solar-powered watches need batteries?

A solar-powered watch needs to have a battery to store the electrical energy that has been converted from light by the solar cells. This battery can be either a rechargeable or non-rechargeable battery such as a lithium-ion, nickel metal hydride, or alkaline. Some manufacturers, like Citizen, claim their solar watches don't use batteries.

Can a solar watch work without a battery?

Technically, a solar watch can work without a battery. However, since solar energy is available only during the day, the watch needs a battery to store energy for night use. A running solar watch promises years of efficient performance, making it a favorite watch for those who value efficiency.

Does a Seiko solar watch battery need to be replaced?

Seiko is a long-standing manufacturer of watches, whose journey of providing quality watches dates as far back as 1881. Recently, they've switched to solar watches, and the numbers again seem to be working in their favor. And while the Seiko solar watch battery will last a long time, it eventually needs replacement.

Do Eco-Drive solar watches need to be replaced?

An Eco-Drive solar watch uses a specific type of rechargeable battery called a secondary battery, which may eventually need replacement as it ages. Remember, if you're not comfortable doing battery replacement yourself, consider taking your watch to a professional. You tinker with your watch's heart after all- you want to handle it with care.

What happens if a solar watch battery spoils?

There is a difference between a regular battery and a solar watch battery. The latter is called a secondary cell, and a regular battery cannot replace its function. If anything, it will damage your solar watch. When your solar watch battery spoils, your best bet is a professional, such as the manufacturer or retailer of your watch.

Yes, you can change the battery in a solar watch. Solar watches use a small solar panel to recharge their internal lithium batteries. When the battery needs to be replaced, you can simply remove the old one and insert a new one.
