

Solar charging ultra-long battery life multi-function backup power supply

Which solar panel is best for small device charging?

A single 100W solar panel is great for small device charging. With a professional parallel connector, you can also parallel 2 GRECELL100W solar panels to get more output power to recharge the high-capacity power stations faster. The solar panel is equipped with PV-rated cables.

How long can a solar battery stay off-grid?

Stay off-grid as long as you like. You've got solar power to keep you going. With high multi-power point tracker (MPPT) efficiency, you can power anywhere with a 600W solar input. Imagine where you'll be in 10 years. These EV-grade batteries will be there, too. They remain healthy for up to 3,000 charge cycles.

What is a Superpack portable power station?

Superpack portable power station is a premium portable energy storage unit equipped with a built-in LiFePO4 battery. It supports three charging methods--car charging, adapter charging, and solar charging--for flexibility. With multiple charging ports, including USB, AC, DC, and Type-C, it can power various devices.

What is a high-end energy storage power supply?

A high-end energy storage power supply with built-in LiFePO4 battery and smart BMS is very useful as emergency, outdoor, balcony solar portable power station.

Why do I need a power supply?

It gives you confidence in any emergency or unexpected power outages and meets your various power needs.
