

Suspended battery cabinet installation video

How do you reinstall a battery cabinet?

Reinstall the left side panel on the left-most battery cabinet after interconnection. Push the third battery cabinet into position, align with the seismic anchoring (if any), level the battery cabinet, and interconnect with the other battery cabinets as described in step 2, step 3, and step 5.

How do you level a battery cabinet?

Remove the side panels that are adjacent to the other battery cabinets. Push the right-most battery cabinet into position. For seismic anchoring, ensure that the rear seismic bracket connects to the rear anchors. Lower the levelling feet until they connect with the floor - use a bubble-level to ensure that the cabinet is level.

How do you tighten a Battery trays?

Secure the cabinet. Remove the four plugs from the bottom of the cabinet. Insert expansion bolts into the expansion bolt holes in the floor, and tighten the expansion bolts. Figure 5-9 Tightening expansion bolts (not installed against a wall) Remove the battery trays shown in the figure.

How do you install a kitchen cabinet?

Determine the cabinet installation position. Draw mounting holes in the installation position according to the drawing. Use a hammer drill to drill holes for installing expansion bolts and then install expansion sleeves in the holes. Drill holes into the concrete floor using a hammer drill. The hole depth ranges from 52 mm to 60 mm.

How do you adjust the anchor bolts on a kitchen cabinet?

Adjust the four anchor bolts at the bottom of the cabinet until all the four castors at the bottom hang in the air and the anchor bolts bear all of the cabinet weight. Check the cabinet levelness using a level. If the cabinet is not level, wrench the anchor bolts.

How do I install a BBB box?

If the cabinet is not level, wrench the anchor bolts. If a BBB box is required when cabinets are combined, install the BBB box by following the instructions in the PDU8000- (0630, 1250, 2000) DCV8-BGA001 BBB Box User Manual. If the cabinet is installed against a wall, only the front connecting plates need to be installed.
