While more than 90% of proposed battery storage additions at grid-scale in the country will be in Ontario and Alberta, according to Patrick Bateman, and both provinces are current leaders in storage adoption in Canada, at present Ontario has around 225MW of behind-the-meter large-scale commercial and industrial (C& I) batteries and around the same amount ...

Australia and New York state are two very different places but both are likely to soon see their first government-backed tenders in which grid-scale energy storage can compete. The tenders are likely to be very different in design and scope. However, the aim of both is to create a mechanism that values the critical role of energy storage in ...

Tender for new energy storage power station in Iceland

Eskom, the state-owned electricity utility of South Africa, has begun tendering for a battery energy storage system (BESS) of minimum size and capacity 80MW / 320MWh. The utility issued a procurement notice at the end of July requesting bids for the Eskom Investment Support Project and Eskom Renewables Support Project. The twin project calls ...
