How much does a Tesla Model S battery cost?

That sounds pretty high, but the breakdown in price shows that the Model S battery itself costs somewhere in the realm of \$12,000-\$15,500. Additional replacement parts, such as connectors and wiring, are sometimes needed, most of those being in the \$20-\$200 range.

How much does it cost to replace a Tesla battery?

It has two trim levels: the Standard Range and Plaid. The S Plaid uses 4-5 battery modules. Considering Musk's claims of \$5000 - \$7000 per module, expect to pay between \$20,000 and \$35,000 (plus labor costs) for a replacement outside the battery warranty. Image courtesy of edmunds.com The Model 3 is Tesla's most popular model.

How much does a 2020 Tesla Model 3 battery cost?

The Recurrent report found the following receipt for the replacement of a 2020 Model 3's battery: As you can see, these figures far exceed the module-only replacement costs mentioned by Musk, with labor also substantial - this isn't a hybrid where a DIY battery replacement is possible. At the above costs, this Model 3's battery is around \$180/kWh.

What type of battery does a Tesla have?

A Tesla has two batteries: a propulsion battery used to power the vehicle motors (vroom vroom) and a 12-volt battery to power accessories and security. Everything in this article focuses on the larger propulsion battery, which is both expensive and labor intensive to replace. Does LFP vs NCA battery type matter?

Does Tesla need a battery replacement?

It's very rare for Tesla vehicles to require battery replacement since the automaker designs that component to last through the long haul. For example, Tesla has indicated that the standard-range battery in the Model 3 will provide 360,000 miles of service.

How many miles will a Tesla battery last?

For example, Tesla has indicated that the standard-range battery in the Model 3 will provide 360,000 miles of service. And the carmaker says the long-range battery in the popular Model 3 will soldier on for 465,000 miles. How Much Does Battery Replacement Cost in EVs Made By Other Carmakers?

Tesla, the company best known for Elon Musk and its electric vehicles, is a pretty huge name too in domestic battery storage.. So it was an exciting moment when the Powerwall 3 finally made it to UK shores in June 2024.

The cost of a battery for a Tesla depends on the model and battery size. At \$5,000 to \$7,000 per module, a 4-module battery pack could cost around \$20,000 to \$28,000 to replace (excluding labor costs).
