

The best battery capacity

What is Apple's battery capacity?

Apple doesn't publicly state the battery capacity of its phones, but it appears to be a 4383mAh cell. However the power efficiency of the A16 Bionic chip (which also delivers great performance) and Apple's optimisations lead to stellar battery life. Even on incredibly long, demanding days, you'll end the day with charge to spare.

Which phone has the best battery life?

One of three Nothing smartphones in this list, the Phone (2a) Plus has the edge when it comes to battery life. Its 5000mAh cell is nothing special, but PCMark data and real-world usage show it can last a very long time on a single charge.

Which Asus phone has the best battery life?

That's mostly thanks to the new Snapdragon 8 Elite chip, so we expect that other new phones powered by that chip, like the OnePlus 13, may soon be nipping at Asus' heels. For now, however, the ROG Phone 9 Pro takes the crown for delivering the best battery life and performance.

Do smartphones have a good battery life?

Modern phones are remarkable, offering the power and functionality of a high-end PC within a device that can fit in the palm of your hand. But for all the improvements to smartphones in recent years, one thing has stayed stubbornly consistent: battery life.

What is the biggest battery in an iPhone?

While the exact capacity isn't officially disclosed, teardowns suggest it's around 4,685mAh. This is the biggest battery ever used in an iPhone. It offers excellent battery life. Based on our tests, it can last around 22 hours of web browsing, 10 hours of video streaming, and 12 hours of gaming.

Which ROG Phone has the best battery?

Take the ROG Phone 8 Pro, which currently heads our list after turning in the best result we've ever seen on our battery test. (A successor -- the ROG Phone 9 -- is set to debut this month, powered by a chipset that promises even greater efficiency, so stay tuned to see if the record gets shattered once again.)
