I've been having a hard time sourcing certain electrolytic capacitors. In particular, many of the conventionally-recommended lines of caps appear to be end-of-life, soon to be (or already) no longer manufactured. Below is what I've found regarding some of the more popular product lines, focused on those mentioned in

Multilayer ceramic capacitors or as they are often referred to as MLCC's are specially designed capacitors and are engineered to consist of a "multilayer" structure. This structure includes a ceramic material and metal conducting layers. The ceramic layers insulate the capacitor, this helps to reduce heat loss which in turn improves the efficiency of the product. Multilayer ...
