

What are the battery cell companies in Latvia

Will a new battery factory be built in Latvia?

Facebook The Swedish company Anodox Energy Systems wants to build two factories in Latvia to produce batteries for electric vehicles. According to Latvia's Ministry of Economy, a plant for the assembly of battery packs will be built first in the port of Riga. The second plant, which will focus on cell production, is to follow shortly afterwards.

Will LFP be the first battery factory in Europe?

The planned LFP factory is to be the first of its kind in Europe. "This means that the battery production cycle will be completed in Latvia, from raw material to complete system," says Kaspars Rozkalns, director general of the Latvian Investment and Development Agency.

Why did Anodox choose Latvia?

Anodox chose Latvia "based on its location, automotive ecosystem, and government incentives". Yet the country is only meant to be the starting point for setting up production facilities across Europe. The company is reportedly also considering Germany, Greece and Luxembourg as possible investment locations.
