

What to do after replacing the battery pack

How do I replace a car battery?

Place your new battery in the battery tray and tighten the battery hold-down strap. Ensure that you connect the positive battery cable first, followed by the negative. If you used a BMS to save your vehicle's settings, you should be good to drive! If you didn't, read on to learn how to restore any potentially lost settings.

How do I pass a battery test after changing my battery?

Follow these steps to pass a check after changing your battery: Drive your car for 75-100 miles to reset the monitors, check the readiness state with an OBD2 scanner, keep records, schedule the inspection when the monitors say "Ready," and do the test.

How long should you drive a car after replacing a battery?

After replacing the battery, it's crucial to drive your car for 75 to 100 miles to allow the onboard computer to reset its systems and readiness monitors. Use an OBD2 code reader to check if your car's monitors are "Ready," indicating proper emission control system function.

How do I install a new battery?

Follow the steps above in reverse to install your new battery. Place your new battery in the battery tray and tighten the battery hold-down strap. Ensure that you connect the positive battery cable first, followed by the negative. If you used a BMS to save your vehicle's settings, you should be good to drive!

How do you remove a battery from a car?

Turn off the vehicle and take the key off the cylinder to avoid shortcuts. Take the negative terminal off the battery post and place it carefully in such a way that it doesn't touch the post before you want it. Take the positive terminal off and ensure the cables don't touch the battery or each other.

How long after a new car battery installation should I reset?

It's easy to overlook potential issues that may arise from such a seemingly simple task. After a new car battery installation, drive 75-100 miles to reset OBD-II readiness monitors in Ready state, use an OBD2 scanner to verify readiness, and then schedule and pass the inspection.
