

# What to do if solar power is installed

You are not normally allowed to switch your solar power system on until your new meter is installed. To help pass the time, you can do some simple checks of the install. I'm not ...

While solar power provides plenty of promise in terms of saving energy costs while reducing our environmental impact, the companies involved are ultimately businesses at the end of the day. Unfortunately, this means that they can eventually close for a wide variety of reasons. When a solar company goes out of business, it can leave former customers in a difficult ...

How many solar panels do you need to power a house? While it varies from home to home, US households typically need between 10 and 20 solar panels to fully offset how much electricity they use throughout the year. The goal of most solar projects is to offset your electric bill 100%, so your solar system is sized to fit your average electricity use. Here's a basic equation you can ...

Here are all the steps your chosen installer will take to get the best solar panel system possible on your roof. 1. Check if you need planning permission. Most households in the UK don't need planning permission to get solar panels installed.

Battery storage costs substantially less when it is installed at the same time as solar panels than if it's added to a solar system retroactively. 9. Do I have trust? Do you trust what you've been told? Do you trust the equipment? Do you trust the installer? Do you trust that this is the right system for you? If the answer to these questions is yes - then solar is amazing. If the ...

Learn about what happens after your solar panels are installed, and what steps to take to keep them functioning at their best.

Once you have your solar installed and switched on, there are a couple of questions we recommend you ask. What price will they pay you for your electricity (in cents per kilowatt hours (kWh))? What is the cost of the ...

After the meter reconfiguration or a new meter installation, you should be able to use your Solar System immediately. Sometimes the Distributors leave it off, you can contact your Solar Retailer to turn it on. Once Solar ...
