

Which battery companies have settled in Argentina

How many companies are involved in a lithium project in Argentina?

These are some of the findings from a report prepared by the consulting firm Aleph Energy, led by Daniel Dreizzen, which analyzes the global lithium market while delving into Argentina in greater detail. These are the 41 companies of various characteristics that participate in the country's 64 projects.

Who owns Argentina lithium?

The company is also a member of the Grosso Group, a resource management group that has pioneered mineral exploration in Argentina since 1993. Argentina Lithium has four key projects, covering over 67,000 hectares in the country's portion of the Lithium Triangle, each with its unique prospects and strategic significance:

Where will lithium batteries be made in Buenos Aires?

State company Y-TEC, the tech arm of YPF, will open the first lithium battery cell factory in September, in La Plata, the capital of Buenos Aires province. Another plant, five times bigger, will kick off in Santiago del Estero in 2024.

How many people can a lithium battery power Buenos Aires?

The plant will generate 15 megawatts per year, which means it will produce lithium batteries capable of powering 2500 households. The batteries are envisaged for use in rural areas. For example, there is already a Buenos Aires province-backed project to supply the Paulino-Berisso island, home to 70 families who are currently off the power grid.

Does Y-TEC sell lithium in Argentina?

In the case of lithium, Y-TEC signed a contract with American company Livent, which extracts the mineral in Catamarca and, for the first time, sold part of its production in Argentina. According to Salvarezza, for industrialization to grow in scale, part of the production ought to be sold on the local market.

Is Argentina facing a dilemma over the future of lithium?

Argentina is facing a dilemma over the future of its lithium. President Alberto Fernández and his government want to boost the sector's development, and for the state to play a prominent role in both the extraction of the mineral and the development of batteries for electric vehicles (EVs).

Lithium companies in Argentina. Among the 41 companies -- in some cases, more than one company owns the same project -- currently operating lithium projects in the country, Dreizzen has noted that some are not ...
